August 2026 Strategic & Technical Update

08/2026 · Founder: Yannick Durindel · Confidential

€900	6mo	€0	5	€500K	1
Cash on hand	Runway	Revenue	OEM, in review	Raising @ €4.5M pre	Founder

Key Metrics

Metric	Value (August 2026)	Status / Context
Cash on Hand	€900	
Monthly Burn Rate	~€150	No founder salary
Runway	~6 Months	
Revenue	€0	Pre-revenue, licensing model
Team	1 founder	+ 2 advisors onboarded
OEM Contacts	5	In review, up from 3

Highlights

- **Patent filed: FR2611116** filed at INPI (15 Aug 2026), pending examination — provisional package complete (prior art vs. 10 competing patents, description, claims, figures).
- **IP ownership secured:** invention assignment, founder → SAS, signed.
- **Supplier outreach at scale:** 34 suppliers contacted across 5 subsystems (electrolyzer, compressor, pressure vessel, nozzle, balance-of-plant); 4 electrolyzer quotes in hand (€5,875–€18,900), 30 pending. Sourced cost model built for every subsystem (~€65K–100K hardware, 2 demo units).
- **Fundraising plan finalized:** ask set at **€500K for 10% (€4.5M pre-money)**, BSA AIR; sourced use-of-funds model (~€350K–425K); tiered investor list built, France + international.
- **Digital twin:** building a dummy model to run CFD and generate first views, rather than waiting on supplier CAD.

September Objectives

- **Fundraising:** begin active outreach on the finalized €500K round — angel investors and funds specialized in energy, mobility, and deep-tech.
- **Suppliers:** convert compressor, pressure vessel, nozzle, and balance-of-plant RFQs into firm quotes; lock the BOM.
- **Digital twin:** run CFD on the dummy model; produce first renders/views.
- **Patent:** monitor INPI examination, respond to any office actions.

The Ask

- **Introductions:** angel investors or funds specialized in energy, mobility, or deep-tech.
- **Introductions:** if you know contacts at BMW or other car manufacturers, we'd welcome an introduction to pitch them the idea.
- **Fundraising:** opening the €500K pre-seed round (BSA AIR, €4.5M pre-money) — targeting October 2026, open to closing later for the right investor.

N.B.: relocating to Munich end of September 2026 — closer to BMW and Germany's automotive/hydrogen ecosystem.

Thank you for your continued partnership. For inquiries, please contact Yannick Durindel directly.
