Key Metrics

Metric	Value (July 2026)	Status / Context
Cash on Hand	€1,000	
Monthly Burn Rate	< €200	No founder salary
Runway	~6 Months	Not derived from burn — assumes future rent
Revenue	€0	Pre-revenue, licensing model
Team	1 founder	+ advisors onboarding
OEM Contacts	3	In review

Highlights

- **Patent filing underway:** after several working meetings with INPI, filing the French utility patent application.
- **Supplier outreach:** opened discussions with electrolyser and compressor suppliers to firm up the technical and cost basis of the system.
- **Compression strategy:** refining the approach to reduce part count and cost.
- **Digital twin:** building a full-scale digital twin of the end product to run simulations and generate renders, ahead of locking in system specs.
- **Advisory board:** onboarding several advisors, each bringing distinct skills to sharpen strategy and open the right doors.

August Objectives

- **IP:** complete and submit the French utility patent filing.
- **Suppliers:** narrow down electrolyser and compressor suppliers.
- **Digital twin:** advance the full-scale simulation model and produce first renders.
- **Advisors:** finalize onboarding of the advisory board.

The Ask

- **Introductions:** if you know contacts at car manufacturers, we'd welcome an introduction to pitch them the idea.
- **Introductions:** warm paths into Plug and Play or similar accelerator/corporate programs.
- **Fundraising:** targeting October 2026 to open a pre-seed round of ~€1M.

Thank you for your continued partnership. For inquiries, please contact Yannick Durindel directly.
