Key Metrics

Metric	Value (June 2026)	Status / Context
Cash on Hand	€2,000	
Monthly Burn Rate	< €200	
Runway	10 Months	No round in progress
Revenue	€0	Pre-revenue, licensing model
Team	1	Founder
Prototype Output	6 L/h	POC
OEM Contacts	3	Potential, early discussion

Highlights

- **Incorporation:** Registered in France (June 2026).
- **Refocus:** considering a shift to technology licensing for Tier-1 automotive and energy OEMs.
- **POC built:** water-to-hydrogen conversion running at 6 L/h.
- **3 potential OEM contacts:** Toyota, BMW, Mercedes-Benz — first contact established.
- **VivaTech 2026:** many utility/infrastructure funds engaged.
- **Founders Inc.:** Top 10% of applicants.

OEM Pipeline

State: 3 potential contacts, early discussion, first contact established.

- **Toyota** (Open Labs)
- **BMW** (Startup Garage)
- **Mercedes-Benz** (Autobahn)

Challenges & Risks

- **Car manufacturers:** getting into relations with the right people is slow going.
- **Patent office:** establishing contact and moving the filing process forward.
- **Network:** connecting with the right people to get started in both areas above.

July Objectives

- **IP:** file 2 French utility patents.
- **IP:** map PCT extension across several countries.

The Ask

- **Introductions:** if you know contacts at car manufacturers, we'd welcome an introduction to pitch them the idea.

Thank you for your continued partnership. For inquiries, please contact Yannick Durindel directly.
